

FIN-10-KPI-DASHBOARD

FIN-10: KPI Dashboard — Project AEGIS / Carrington Storm Motors

Document Version: 1.0
Date: July 2026
Prepared For: Investor Review — Series A
Classification: Confidential — Investor Eyes Only
Model Period: FY2027–FY2031 (5-Year Forward Projection)

Executive Summary: Measuring What Matters

Carrington Storm Motors’ KPI framework is built on the principle that a defense-industrial-technology company must track three categories of metrics: (1) Financial KPIs — is the business economically viable and getting stronger? (2) Operational KPIs — are we building and delivering what we promised? (3) Strategic KPIs — are we capturing the market position that generates long-term value? Each category has 5-7 leading and lagging indicators, tracked at appropriate cadences.

Williams Heuristic: If you can’t measure it, you can’t manage it. If you measure everything, you manage nothing. The KPIs below are the vital few — the metrics that, if they’re green, mean the company is on track, and if they’re red, mean something fundamental is wrong. Everything else is noise.

SECTION 1: Financial KPIs

TABLE 10.1: Master Financial KPI Tracker — Annual Targets

KPI	Y1 Target	Y2 Target	Y3 Target	Y4 Target	Y5 Target	Frequency
Revenue (\$M)	\$11.5	\$45.0	\$180.0	\$500.0	1,200.0	Monthly
Cash Runway (months)	12.5	4.5*	18+	24+	36+	Monthly
Burn Multiple**	NM	NM	1.2x	0.4x	0.2x	Quarterly

*Pre-Series B. With Series B (\$100M), cash balance jumps to ~\$81M. **Burn Multiple = Net Cash Burn / Net New ARR. Only meaningful when revenue is recurring. Used here as Cash Burn / Revenue Growth for industrial comparison.

KPI 1.1: Revenue Growth Rate

Definition: (Current Period Revenue / Prior Year Period Revenue) - 1

Target: >100% YoY through Year 5. Any quarter below 50% sequential growth (QoQ annualized) triggers a growth review.

Why It Matters: Revenue growth is the primary validator of product-market fit. In Years 1-3, growth >200% demonstrates that the market is adopting EMP hardening at scale. A deceleration below 100% before Year 4 would indicate that the addressable market is smaller than modeled, regulatory catalysts aren’t materializing, or competitors are taking share.

Reporting Cadence: Monthly. Board deck includes trailing 3-month and trailing 12-month growth rates.

KPI 1.2: Gross Margin

Definition: (Revenue - COGS) / Revenue

Target by Product Line: | Line | Y1 Floor | Y3 Target | Y5 Target | |—|—|—|—| | ACS | 10% | 33% | 56% | | AHM | 28% | 45% | 60% | | CCF | 3% | 15% | 18% | | PMR | 28% | 45% | 58% |

Why It Matters: Gross margin measures manufacturing efficiency and pricing power. If gross margin is below target, either: (a) manufacturing costs are higher than modeled (learning curve isn’t materializing), or (b) pricing is weaker than expected (competitive pressure or poor negotiation). Management must diagnose which and respond.

Corrective Action: Margin below 80% of target for 2 consecutive quarters → manufacturing cost review or pricing strategy adjustment.

KPI 1.3: Cash Runway

Definition: (Cash Balance + Available Credit Lines) / (Average Monthly Net Cash Burn)

Target: Never below 6 months. Yellow flag at 9 months. Red flag at 6 months (fundraising must begin immediately).

Why It Matters: Running out of cash is the #1 cause of startup death. This is the single most important financial metric in Years 1-3. After Series B (Year 3), cash becomes abundant and this metric transitions to a monitoring role rather than a survival metric.

KPI 1.4: Burn Multiple

Definition: (Beginning Cash - Ending Cash) / (Ending Revenue Run-Rate - Beginning Revenue Run-Rate)

Target (post-breakeven): <1.0x (meaning each dollar of cash consumed generates >\$1 of incremental annualized revenue). <0.5x is excellent.

Interpretation: - Burn multiple >2.0x: inefficient growth — spending too much for each dollar of incremental revenue. Operational review required. - Burn multiple 1.0-2.0x: acceptable for high-growth industrial company. - Burn multiple <1.0x: capital-efficient growth. Company can self-fund an increasing share of growth. - Burn multiple <0.0x: company is generating cash, not burning it. (Achieved post-breakeven.)

SECTION 2: Operational KPIs

TABLE 10.2: Master Operational KPI Tracker

KPI	Y1	Y2	Y3	Y4	Y5	Frequency
ACS Units Shipped	80	340	1,400	4,500	10,000	Weekly
AHM Units Shipped	200	1,200	8,500	30,000	78,000	Weekly
Charlemagne Vessels Delivered	1	3	10	22	48	Quarterly
Phantom Systems Shipped	20	95	360	920	1,850	Monthly
IFH Projects Completed	4	16	42	85	155	Monthly
Manufacturing Yield (ACS)	85%	90%	94%	96%	97%	Weekly
Manufacturing Yield (AHM)	92%	95%	97%	98%	98.5%	Weekly
On-Time Delivery Rate	80%	88%	93%	95%	97%	Monthly
Customer Count (active)	15	55	180	450	900	Monthly
Certified Installers (trained)	5	30	95	220	450	Quarterly
Insurance Policies Active (K)	5	22	85	170	340	Quarterly
Total Active Employees	25	75	200	450	900	Monthly

KPI 2.1: Manufacturing Yield

Definition: (Units passing final QC / Units started in production) × 100. Measured per production line.

Target: >90% by end of Year 1 for ACS (semi-automated line). >95% by Year 3 (fully automated). >97% by Year

5.

Why It Matters: Yield directly impacts COGS. A 90% yield means 10% of material and labor is wasted. At 10,000 units/year, a 1% yield improvement saves ~\$300K in materials and avoids rework costs. Yield is also a proxy for manufacturing process maturity — high yield means the process is dialed in.

KPI 2.2: On-Time Delivery Rate

Definition: (Orders delivered by committed date / Total orders) × 100.

Target: >90% by Year 2; >95% by Year 4.

Why It Matters: Government and utility customers have low tolerance for late delivery. A pattern of late deliveries damages credibility with procurement officers, reduces reorder rates, and can trigger contract penalties. This is particularly critical for Charlemagne vessels, where late delivery of a \$7M vessel damages the relationship with the entire service branch.

KPI 2.3: Customer Concentration (Herfindahl-Hirschman Index approach)

Definition: Sum of squared revenue shares of top 10 customers. Scored 0-10,000 (10,000 = single customer).

Target: <2,000 by Year 3; <1,000 by Year 5.

Why It Matters: Customer concentration is the silent killer of defense contractors. Losing one big contract shouldn't threaten the company. This KPI ensures revenue diversification is happening on schedule.

SECTION 3: Strategic KPIs

TABLE 10.3: Master Strategic KPI Tracker

KPI	Y1	Y2	Y3	Y4	Y5	Frequency
Government Contracts Won (cumulative)	6	22	60	140	280	Quarterly
Insurance Carrier Partnerships (signed)	3	8	20	35	50	Quarterly
Countries with Active Operations	1	3	10	25	50	Quarterly
Patents Filed / Granted (cumulative)	20 / 6	35 / 10	55 / 18	75 / 28	100 / 40	Quarterly
Peer-Reviewed Publications	3	8	15	25	35	Annually
Regulatory Actions Advanced (cumulative)	2	5	12	20	30	Quarterly
Net Promoter Score (NPS)	—	45	55	60	65	Quarterly
Media Mentions (tier-1 publications)	5	20	50	100	150	Monthly
Speaking Engagements (conferences, hearings)	8	20	40	60	80	Quarterly

R&D Documents in Corpus (cumulative)	7,000	8,000	10,000	13,000	16,000	Monthly
--------------------------------------	-------	-------	--------	--------	--------	---------

KPI 3.1: Government Contract Win Rate

Definition: (Government contracts won / Government contracts bid) × 100.

Target: >40% win rate by Year 2 (as incumbency and references build). >60% by Year 4 (as CSM becomes the default choice for EMP hardening).

Why It Matters: Government BD is expensive (\$85K+ per bid in Year 1). A low win rate means the BD team is chasing the wrong opportunities or the value proposition isn’t resonating. A high win rate means the company is bidding selectively and winning consistently — the most capital-efficient government BD approach.

KPI 3.2: Insurance Carrier Partnership Velocity

Definition: New insurance carrier partnerships signed per quarter. Also: policies-in-force growth rate.

Target: 1-2 new carriers per quarter in Year 2-3; 3-4 per quarter in Year 4-5.

Why It Matters: Insurance partnerships are the highest-margin revenue stream (85% gross margin) and the most scalable distribution channel for Aegis Home. Each carrier represents a potential 5,000-50,000 policies over 5 years. Partnership velocity directly predicts IPP and AHM-insurance-channel revenue 12-18 months forward.

KPI 3.3: International Footprint

Definition: Number of countries with either: (a) an active customer, (b) a certified installer, or (c) a signed distribution agreement.

Target: 3 countries by Year 2 (US, UK, Japan); 10 by Year 3 (add Australia, South Korea, Germany, France, Canada, Norway, Singapore); 50 by Year 5.

Why It Matters: The 200-country diplomatic groundwork is a strategic asset that must convert to commercial operations. This KPI measures conversion velocity. A country counts as “active” when revenue is generated, not when an LOI is signed.

KPI 3.4: Intellectual Property Velocity

Definition: (New patent applications filed per quarter) + (New research documents added to corpus per month).

Target: 3-5 patent applications per quarter; 100+ new research documents per month.

Why It Matters: The research corpus is CSM’s primary competitive moat. If the rate of new document creation slows, the moat is filling in. This KPI ensures R&D investment is producing durable, defensible output, not just consuming budget.

SECTION 4: Monthly Reporting Cadence

TABLE 10.4: Reporting Calendar

Report	Audience	Frequency	Timing	Contents
CEO Dashboard	CEO, COO, CFO	Weekly	Monday AM	Cash balance, burn rate, units shipped (week), top 3 risks
Financial Flash	CFO, CEO, Board observers	Monthly	5th business day	Revenue, gross margin, EBITDA vs. plan, cash, headcount Units produced, yield,

Operational Review	COO, Production VPs	Monthly	10th business day	on-time delivery, capacity utilization, quality incidents
Sales Pipeline Review	CRO, BD team	Bi-weekly	Every other Wed	Pipeline value (\$), stage distribution, win rate, top 10 opportunities
Board Package	Board of Directors	Quarterly	2 weeks before board meeting	Full financials, KPI dashboard, strategic initiatives update, risks/opportunities, CEO letter
Investor Update	All investors	Quarterly	3 weeks after quarter close	Revenue, growth, cash, key wins, key challenges, asks for help
Annual Operating Plan	Board, SLT	Annually	November (for next FY)	Full-year budget, headcount plan, KPI targets, strategic priorities
Strategy Offsite	Board, 18-Agent Command	Annually	January	3-year strategy, competitive landscape, M&A opportunities, organizational design

SECTION 5: Board Deck Template Outline

Every quarterly board meeting, the CEO presents a standardized deck. The outline below ensures consistency and comparability across quarters.

Board Deck Structure (90 minutes):

1. **CEO Letter (5 min)** — 1-page narrative: what went well, what didn't, what keeps me up at night.
2. **KPI Dashboard (10 min)** — Traffic-light summary of all KPIs vs. plan. Green/yellow/red for each. Focus discussion on reds.
3. **Financial Review (20 min)** — CFO presents: P&L vs. budget, cash flow, balance sheet, revenue by product line, margin bridge.
4. **Product & Manufacturing Update (15 min)** — COO presents: production volumes, yields, capacity expansion, new product development milestones.
5. **Commercial Update (15 min)** — CRO presents: pipeline, wins/losses, customer count, channel development, competitive intelligence.
6. **Strategic Initiatives (10 min)** — CEO presents: regulatory progress, international expansion, insurance partnerships, M&A landscape.
7. **People & Culture (5 min)** — CPO/CEO: headcount vs. plan, key hires, attrition, engagement survey results.
8. **Risks & Mitigations (5 min)** — CRO/CEO: top 5 risks, probability and impact, mitigation status.
9. **Forward Look (5 min)** — CEO: next quarter's top 3 priorities, any decisions needed from board.
10. **Closed Session (30 min)** — Board only (no management).

SECTION 6: Investor Update Format

Quarterly investor updates should be sent within 3 weeks of quarter close. The format is deliberately short (investors are busy; the board package is for the board; the investor update is a highlight reel).

Investor Update Template:

Subject: CSM Q[#] FY20## Update — [\$XM] Revenue, [X]% Growth, [Key Win]

Hi [Investor Name],

Q[#] was a [strong/good/challenging] quarter for Carrington Storm Motors.

- THE NUMBERS:
- Revenue: \$[X.X]M ([X]% vs. Q[#] last year)
 - Gross Margin: [XX]%
 - Cash: \$[XX]M ([XX] months runway)
 - Headcount: [XXX] ([+/-X] this quarter)
 - EBITDA: [\$X.X]M

- KEY WINS:
- [1-3 bullets – contracts signed, products launched, regulatory progress]

- KEY CHALLENGES:
- [1-2 bullets – honest about what's hard]

- WHAT WE NEED HELP WITH:
- [1-2 specific asks – introductions, advice, resources]

—

As always, happy to jump on a call to go deeper. Full financials attached.

Best,
[CEO Name]
CEO, Carrington Storm Motors

SECTION 7: KPI Dashboard — Single-Page Summary (Year 5 Target State)

This is the “one-pager” the CEO reviews every Monday morning.

Weekly CEO Dashboard (Y5 target state):

Metric	This Week	Last Week	Target	Status
Cash (\$M)	\$212.8	\$208.5	200 + * * <i>NetCashFlow</i> (K)**	+\$1,250
Top 3 Risks:	1. DOJ antitrust review of competitor merger (monitoring) 2. Line 6 installation 2 weeks behind (recovery plan in place) 3. Norway contract delayed (political, not commercial — Q1 close)			

*MTD = month-to-date. QTD = quarter-to-date. Month is not yet complete — on track.

SECTION 8: KPI Maturation Over Time

The metrics that matter evolve as the company matures. The table below shows which KPIs are primary at each stage.

TABLE 10.5: KPI Priority by Company Stage

Stage	Years	Primary KPIs	Secondary KPIs
R&D / Pre-Revenue	Pre-A	Research documents, patents filed, prototype performance, team quality	Cash burn, partnership LOIs
Early Commercial	V1-V2	Revenue growth, cash	Gross margin, yield, win

Early Commercial	Y1-Y2	runway, customer count, first deliveries	rate
Scaling	Y3-Y4	Revenue, gross margin, EBITDA, unit volume, on-time delivery	NPS, international footprint, insurance policies
Mature Growth	Y5+	EBITDA margin, FCF, ROIC, market share, revenue/employee	Patent velocity, brand awareness, employee engagement

El Segundo Calm: The KPIs that matter in Year 1 (survival) are not the KPIs that matter in Year 5 (excellence). A company that's still obsessing over cash runway in Year 5 has failed to build a sustainable business. A company that's obsessing over NPS in Year 1 is optimizing the wrong thing (you don't have enough customers for NPS to be statistically meaningful). Match the metric to the maturity. This is the KPI equivalent of "right tool for the right job."

SECTION 9: Red Flag Triggers

Certain KPI thresholds automatically trigger executive review (not panic, but structured diagnosis):

Trigger	Condition	Action
Cash < 6 months runway	Cash / Avg. Monthly Burn < 6	CEO calls emergency board meeting within 48 hours
Revenue < 70% of quarterly plan	Any quarter	CFO + CRO joint diagnostic within 1 week; board notified
Gross margin < 80% of quarterly plan for 2 consecutive quarters	Any product line	COO + CFO manufacturing cost review; pricing strategy review
Key customer loss	>\$1M annual revenue customer lost	CEO + CRO post-mortem within 2 weeks; board notified
Manufacturing yield < 85% for 1 month	Any production line	COO stops line for root cause analysis within 24 hours
Patent application velocity < 2/quarter for 2 quarters	After Year 2	CTO + CEO IP strategy review; assess R&D productivity
Employee attrition > 15% annualized	Any quarter	CPO + CEO culture and comp review; stay interviews with key personnel

SECTION 10: Investor Reporting Commitments

Upon Series A close, CSM commits to the following investor reporting:

Report	Frequency	Delivery Method
Monthly Financial Flash	Monthly (by 5th business day)	Email (PDF summary + link to data room)
Quarterly Investor Update	Quarterly (by 3 weeks post-close)	Email (narrative + financials)
Quarterly Board Package	Quarterly (2 weeks before board)	Secure data room (full financials, KPIs, narrative)
Annual Audited Financials	Annually (by March 31)	Data room + distribution to all shareholders
Ad-Hoc Material Events	As needed (within 48 hours)	Email to all investors (major wins, material risks, fundraising)
Annual Shareholder Meeting	Annually (Q1)	Virtual or in-person; all shareholders invited
