

ROAD-09-PARTNERSHIP-STRATEGY

ROAD-09: STRATEGIC PARTNERSHIP DEVELOPMENT ROADMAP

Carrington Storm Motors — Project AEGIS

Insurance • Utilities • Construction • Maritime • Defense • Materials • Academia

Document Status: CONFIDENTIAL — Accredited Investor Eyes Only
Version: 1.0 — 15 July 2026
Classification: Business Development Strategy — DO NOT DISTRIBUTE EXTERNALLY
Author: Director Kairos Steele, CITADEL — Aegis Operations Command
Partnership Liaison: Specialist Aura Kind (EMBARK) — external stakeholder engagement

PARTNERSHIP PHILOSOPHY

Carrington Storm Motors cannot build the Dielectric Citadel alone. The electromagnetic hardening of civilization requires a coalition: insurance carriers to price the risk reduction and fund the build-out; electric utilities to deploy infrastructure products; construction firms to install Aegis Homes at scale; maritime operators to retrofit the Charlemagne Fleet; defense contractors to integrate Phantom robots and hardened C4I; materials suppliers to provide MXene precursors, basalt fiber, and ceramic powders; and research universities to independently validate every claim. CSM’s partnership strategy is tiered: Tier 1 (Founding Partners — equity/revenue share relationships), Tier 2 (Strategic Partners — long-term supply/purchase agreements), Tier 3 (Implementation Partners — project-specific MOUs). This document maps the engagement strategy for each partner category.

PARTNER CATEGORY 1: INSURANCE CARRIERS

The Economic Engine of Carrington Hardening

1.1 Why Insurance Partners Are Critical

Insurance carriers hold the economic key to mass adoption of Carrington hardening. If a carrier can demonstrate — via actuarial data — that an Aegis Home reduces expected loss by 35% during a geomagnetic storm, they can offer a 15% premium reduction. The homeowner saves money. The carrier reduces risk concentration. CSM sells products. This is the flywheel.

1.2 Target Insurance Partners

Partner	Partner Type	Rationale	Relationship Stage	Engagement Lead
Swiss Re	Tier 1 — Founding Insurance Partner	World’s largest reinsurer; insures the insurers; if Swiss Re prices GIC risk into their catastrophe models, every primary carrier follows; Swiss Re has published reports on solar storm risk (2013, 2019) — warm audience	INITIAL OUTREACH — Identify Swiss Re Catastrophe Perils team contact; share CSM pilot data plan; propose joint white paper on GIC risk pricing	Steele + Kind
		Second-largest global insurer; strong		

AXA	Tier 1 — Founding Insurance Partner	presence in Europe (Charlemagne Fleet market) and Asia; AXA Climate subsidiary focused on climate/emerging risk — natural fit for Carrington risk; AXA Research Fund could co-fund academic validation studies	INITIAL OUTREACH — Leverage Charlemagne European market angle; propose AXA Climate partnership	Steele + Vaun
Chubb	Tier 1 — Founding Insurance Partner	Largest publicly traded P&C insurer; strong in high-net-worth homeowners (Aegis Home early adopter demographic); Chubb has history of insuring novel risks (cyber, kidnap & ransom) — Carrington is next novel risk	INITIAL OUTREACH — Target Chubb Personal Risk Services division; premium Aegis Home customer base aligns with Chubb's high-net-worth book	Steele + Kind
AIG	Tier 2 — Strategic Insurance Partner	Major US commercial lines carrier; infrastructure and utility insurance; Aegis Home commercial builder's risk, Phantom robot liability, Charlemagne hull insurance	WAITING — Approach after Swiss Re/AXA/Chubb relationships established and pilot data available	Kind
Lloyd's of London	Tier 2 — Strategic Insurance Partner	Specialty insurance market; can underwrite novel risks faster than regulated carriers; ideal for first-of-kind products (Phantom robot liability, Protonic network equipment insurance, Charlemagne pilot vessel hull coverage)	WAITING — Approach when first CSM products need insurance policies (Q3 2027)	Kind + Vaun
State Farm / Allstate / USAA	Tier 3 — Implementation Partners	Largest US personal lines carriers; mass-market Aegis Home premium credits; USAA specifically — military family customer base (aligned with CSM defense-adjacent positioning)	IDENTIFIED — Will approach with published pilot data (Q2 2029)	Kind
FM Global	Tier 2 — Strategic Insurance Partner	Commercial property insurer with world-class research campus (FM Global Research, West Gloucester RI); could conduct independent fire/explosion testing	INITIAL OUTREACH — Propose research partnership for Aegis Home UL testing at	Steele + Cross

		of Aegis Home products; highly credible third-party validation	FM Global facility
Munich Re	Tier 2 — Strategic Insurance Partner	Competitor to Swiss Re; second engagement creates competitive dynamic; Munich Re has published extensively on climate risk — solar storm is “space climate” risk	INITIAL OUTREACH — Share Swiss Re engagement to create competitive interest Steele

1.3 Insurance Partner Value Proposition — Per Partner Type

Partner Type	CSM Offer	Partner Return
Reinsurer (Swiss Re, Munich Re)	First access to GIC risk data; co-authorship on seminal actuarial paper establishing GIC as insurable peril; seat on CSM Scientific Advisory Board	New risk category to price and underwrite; competitive advantage over non-participating reinsurers; thought leadership
Global Carrier (AXA, Chubb, AIG)	Priority access to CSM pilot data; co-branded insurance products (“AXA Carrington Shield — Powered by Aegis”); premium credit calculation engine integration	New product offering; customer retention (“my carrier protects me from the next Carrington Event”); risk reduction on existing book
Specialty Market (Lloyd’s)	First-of-kind insurance product design collaboration; exclusive underwriting rights for novel CSM products (Phantom, Charlemagne) for defined period	New premium stream from previously uninsurable risks; Lloyd’s tradition of insuring “firsts”
Mass-Market Carrier (State Farm, Allstate, USAA)	Proven actuarial data from pilots; premium credit calculation API; co-marketing for Aegis Home installations	Customer acquisition and retention; reduced catastrophe risk concentration; ESG/CSR positioning

1.4 Insurance Partnership Milestones

Milestone	Date	Description	Lead
Swiss Re introductory meeting	Q3 2026	Present CSM overview, pilot program design, request actuarial collaboration	Steele
Joint white paper published	Q2 2027	“Geomagnetically Induced Current: The Next Insurable Catastrophe Peril” — co-authored by CSM and Swiss Re/AXA actuaries	Kind + Swiss Re/AXA
First parametric insurance product designed	Q4 2027	Trigger: Kp index ≥ 8 or Dst ≤ -500 nT $\rightarrow$ automatic claim payment for Aegis Home owners	Kind + Lloyd’s syndicate
Pilot-based premium credit validation	Q2 2029	12-month Aegis Home pilot data analyzed for claims experience; premium credit recommendation published	Kind + actuarial partners
		State insurance department	

Mass-market premium
credit rollout

Q2 2030

filings approved; Aegis
Home owners receive 5–
15% premium reduction
from participating carriers

Kind + carrier partners

PARTNER CATEGORY 2: ELECTRIC UTILITIES

The Deployment Channel for Infrastructure Hardening

2.1 Target Utility Partners

Partner	Rationale	Products Deployed	Relationship Stage
Pacific Gas & Electric (PG&E)	California utility; proximity to CSM HQ; high wildfire + GIC risk; already investing in grid hardening (undergrounding, covered conductor) — adding GIC hardening is incremental	Aegis Fencing (substations), Transformer dielectric pads, Phantom MK-1 inspection robot	INITIAL OUTREACH — Leverage California wildfire hardening mandate; present GIC hardening as complementary to wildfire mitigation
Southern California Edison (SCE)	Second California utility; GIC monitoring program already active; proximity to El Segundo	Substation hardening, Phantom pilot	INITIAL OUTREACH
Bonneville Power Administration (BPA)	Federal power marketing administration; Pacific NW GIC monitoring leader (BPA has been measuring GIC since 1970s); deep technical expertise	Transformer neutral blocking, Infrastructure monitoring (LandOLil)	INITIAL OUTREACH — BPA is the US leader in GIC research; collaboration on monitoring and mitigation is natural
Xcel Energy	Upper Midwest utility; high GIC risk (Precambrian shield geology); proactive on renewable integration — renewable-heavy grids are MORE vulnerable to GIC (inverter-based resources lack inertia)	Substation hardening, Aegis Home pilot partner (see ROAD-06)	INITIAL OUTREACH
Hydro-Québec	The utility most famously affected by GIC (March 1989 blackout); world leader in GIC mitigation research; operates extensive geomagnetic monitoring network	Transformer neutral blocking, GIC monitoring technology partnership	INITIAL OUTREACH — Hydro-Québec's TransÉnergie division has published extensively on GIC; natural R&D partner
National Grid (UK)	UK transmission operator; high-latitude GIC risk; UK regulatory environment (Ofgem) considering GIC resilience mandates; Charlemagne Fleet UK port operations partner	Substation hardening, Charlemagne vessel shore power interface	INITIAL OUTREACH — Leverage UK Charlemagne partner interest

2.2 Utility Value Proposition

To the Utility: CSM provides proven GIC hardening solutions that reduce transformer neutral current by >90%, preventing the cascade saturation that causes blackouts. Utility benefits: reduced equipment damage, reduced outage duration, regulatory compliance (anticipating future NERC GIC reliability standards), and improved SAIDI/SAIFI reliability metrics.

To CSM: Utilities provide deployment sites for infrastructure pilot programs, reference customers for

commercial sales, and co-funding for pilot installations. Utility partnership is the gateway to the \$85B US grid hardening market.

PARTNER CATEGORY 3: CONSTRUCTION & ENGINEERING FIRMS

The Scale Partner for Aegis Home Deployment

3.1 Target Construction Partners

Partner	Rationale	Role	Relationship Stage
D.R. Horton	Largest US homebuilder (80,000+ homes/year); national scale; can integrate Aegis Home into production building process	Tier 1 — Exclusive US production builder partner for Aegis Home (3-year exclusivity for national builder channel)	INITIAL OUTREACH — Leverage ROAD-06 Aegis Home pilot design; D.R. Horton builds 20 of 50 pilot homes
Lennar	Second-largest US homebuilder; strong in Sun Belt (Gulf Coast pilot region)	Tier 2 — Regional builder partner (TX, FL, Southeast)	INITIAL OUTREACH
Pulte Homes	Strong in Midwest (second Aegis Home pilot region)	Tier 2 — Regional builder partner (Midwest)	INITIAL OUTREACH
Turner Construction	Largest US commercial builder; infrastructure projects (substations, data centers, hospitals)	Tier 2 — Commercial/infrastructure construction partner	INITIAL OUTREACH
AECOM	Global engineering firm; transportation, water, energy infrastructure; international reach for EU/APAC expansion	Tier 2 — Engineering design partner for infrastructure hardening projects	INITIAL OUTREACH

3.2 Construction Partner Value Proposition

To the Builder: Differentiated product offering in a commodity market — “the only Carrington-hardened home in America.” Marketing advantage, premium pricing (\$15,000–\$25,000 additional margin per home), customer acquisition (homebuyers seeking disaster-resilient homes). First-mover advantage in an inevitable market (as GIC risk awareness grows, hardening will become a standard homebuyer consideration).

To CSM: Access to 80,000+ home starts per year through D.R. Horton alone. Standardized installation procedures integrated into builder’s existing trades (electrician installs PMMA POF instead of copper; concrete contractor uses BFRP rebar and geopolymer; carpenter hangs Aegis-C panels instead of drywall). This is the path to volume.

PARTNER CATEGORY 4: MARITIME OPERATORS

The Deployment Channel for Charlemagne Fleet

4.1 Target Maritime Partners

Partner	Fleet Size	Rationale	Relationship Stage
Carnival Corporation	90+ vessels across 9 brands (Carnival, Princess, Holland America, Costa, P&O, AIDA, Cunard, Seabourn)	Largest cruise operator; Alaska/Pacific NW itineraries (high GIC risk); Costa and AIDA European brands (Mediterranean — lower GIC risk but Charlemagne-class applicable); Carnival brand	INITIAL OUTREACH — Target Princess Cruises (premium brand, Alaska focus = highest GIC risk) or Holland America (Alaska expertise) as first brand partner within Carnival

		has largest fleet	Corp
Royal Caribbean Group	60+ vessels (Royal Caribbean, Celebrity, Silversea)	Second-largest; innovative brand (Royal Caribbean builds the largest cruise ships in the world); Icon of the Seas class — if hardened from newbuild, massive PR value	INITIAL OUTREACH — Target Celebrity (premium, environmentally conscious brand)
Norwegian Cruise Line Holdings	30+ vessels (NCL, Oceania, Regent Seven Seas)	Third-largest; strong in Alaska (NCL's "freestyle cruising"); Oceania/Regent premium brands for early adopter demographic	INITIAL OUTREACH
MSC Cruises	20+ vessels	European market leader; Mediterranean + Northern Europe itineraries; privately held (Aponte family) — faster decision-making than public companies	INITIAL OUTREACH — Target MSC for European pilot vessel (Rotterdam partner per Phase III)

4.2 Maritime Value Proposition

To the Cruise Line: Insurance premium reduction of 12-18% per vessel per year. On a \$150,000 annual hull premium, that's \$18,000-\$27,000 savings per vessel. Across 93 vessels, \$1.7M-\$2.5M annual savings — over a 30-year vessel life, \$50M-\$75M in premium savings per fleet. Plus: marketing differentiation ("the only cruise line hardened against solar storms"), passenger safety, regulatory preparedness.

To CSM: \$3.2B total addressable market (93 vessels at learning-curve-adjusted pricing). Each vessel is a floating Aegis Home — a reference installation visible to 3,000 passengers per week. Word-of-mouth marketing at scale.

PARTNER CATEGORY 5: DEFENSE CONTRACTORS

The Gateway to Government Procurement

5.1 Target Defense Partners

Partner	Rationale	Products	Relationship Stage
Northrop Grumman	C4I systems integration; electromagnetic warfare expertise; already builds hardened military electronics; CSM's dielectric approach complements their shielding approach	Phantom MK-1 military variant; hardened C4I shelters using Aegis-C panels; Protonic Network for tactical communications	INITIAL OUTREACH — Target Northrop Mission Systems division
General Dynamics (Electric Boat)	Submarine builder; dielectric, non-magnetic construction is standard in submarine design (reduces magnetic signature for mine/magnetic anomaly detection) — CSM's materials align perfectly with submarine stealth requirements	MXene coating for submarine EMI signature reduction; BFRP structural components; PMMA POF for reduced magnetic signature wiring	INITIAL OUTREACH
Lockheed Martin	F-35, satellite systems; EMI hardening for aerospace;	MXene EMI coating for satellite components; Phantom for space applications (CSMMECH04	IDENTIFIED — Approach

	Skunk Works advanced development programs	— Robot Redesign for Space Exploration); Stellar-Tint for aircraft canopy EMI/optical management Phantom hardened sensor payloads; MXene EMI shielding for radar system components; PMMA POF for weapons system data buses	after MIL-STD certification
Raytheon (RTX)	Radar, electronic warfare, missile systems; deep EMI expertise		IDENTIFIED
Palantir Technologies	Data integration platform for defense/intelligence; AIP (Artificial Intelligence Platform) deployed across DoD	LandOLil integration with Palantir Foundry for defense infrastructure monitoring; digital twin integration for military base GIC risk assessment	INITIAL OUTREACH

5.2 Government Procurement Vehicles

Vehicle	Description	CSM Alignment	Pursuit Lead
SBIR/STTR Phase III	Small Business Innovation Research — Phase I (feasibility, \$50K-\$250K), Phase II (prototype, \$750K-\$1.5M), Phase III (commercialization, non-SBIR funds, sole-source eligible)	CSM applies for SBIR Phase I for MXene EMI shielding DoD applications, Phantom military variant, Protonic tactical comms	Steele
DIU (Defense Innovation Unit)	Fast-track DoD procurement for commercial technology; Other Transaction Authority (OTA) contracts — faster than traditional FAR-based procurement	Phantom MK-1 for disaster response; MXene coatings for military vehicle EMI hardening; Protonic for tactical communications	Calder
DPA Title III	Defense Production Act — funds domestic manufacturing capacity for critical defense materials	MXene production scale-up can be designated “critical material for electromagnetic resilience” → DPA funds Phase II/III manufacturing CAPEX	Steele + Nash
AFWERX	Air Force innovation arm; Tactical Funding Increase (TACTFI) for promising SBIR Phase II projects	Ascension drone for USAF agile combat employment; Stellar-Tint for aircraft canopy; MXene for satellite EMI	Veyne + Voss

PARTNER CATEGORY 6: MATERIALS SUPPLIERS

The Supply Chain Backbone

6.1 Target Materials Partners

Supplier	Material	Rationale	Agreement Type
Drexel Nanomaterials	MAX Phase Ti ₃ AlC ₂ (MXene precursor)	Only commercial supplier of MAX phase; Drexel holds foundational MXene patents (see ROAD-04)	Long-term supply agreement + MXene IP license negotiation
	Elium thermoplastic resin	Sole supplier of Elium; novel chemistry ideal for	Long-term supply

Arkema	Elum BFRP pultrusion resin (BFRP matrix)	CSM's BFRP pultrusion; Arkema investing in Elium capacity	agreement with minimum volume commitment
Technobasalt-Invest	Basalt fiber roving	Leading global basalt fiber supplier (Ukraine-based, expanding production); CSM's BFRP products will drive significant demand	Long-term supply agreement; CSM to become one of Technobasalt's largest customers
CoorsTek	ZrB ₂ , SiC, Si ₃ N ₄ , ZrO ₂ ceramic powders	US-based advanced ceramics manufacturer; defense supply chain approved; reduces Chinese ceramic powder dependency	Strategic supply agreement; co-development of CSM-specific ceramic formulations
Lord Corporation (Parker Hannifin)	MRF-140CG magnetorheological fluid	Sole supplier of CSM's MR fluid; critical to Neural-Grip and Fluid-Damp products	Long-term supply agreement; joint development of CSM-optimized MRF formulation
Chemours	Nafion 115 membrane	Sole supplier of Nafion; critical to Protonic H-FET; single-source risk (see ROAD-03 risk register)	Long-term supply agreement; CSM funds BaZrO ₃ solid-state alternative to reduce Nafion dependency
Mitsubishi Chemical (or Toray)	PMMA POF (plastic optical fiber)	Primary suppliers of PMMA optical fiber; CSM will be a significant volume customer for Phoenix Protocol and Aegis Home/Charlemagne wiring	Volume purchase agreement with price tiering
CATL / BYD	LiFePO ₄ battery cells	Leading LiFePO ₄ manufacturers; CSM's BMS and enclosure design adds value on top of commodity cells	Volume purchase agreement
Aspen Aerogels / Cabot	Polyimide-silica aerogel	Primary aerogel suppliers; CSM products (Cervical-Guard, Cloud-Nest, Pet-Safe, Aegis Home) drive new demand	Supply agreement
Arnold Magnetic Technologies	Samarium-Cobalt magnets	Leading SmCo supplier; CSM's Phantom joint motors and Mag-Float seat rail require SmCo	Supply agreement

PARTNER CATEGORY 7: RESEARCH UNIVERSITIES

Independent Validation & Talent Pipeline

7.1 Target University Partners

University	Research Area	CSM Collaboration	Engagement Stage
University of Washington	Cascadia Subduction Zone geophysics; power systems GIC modeling; Pacific NW pilot site proximity	Aegis Home pilot data analysis; GIC monitoring network design; joint publication on GIC reduction effectiveness	INITIAL OUTREACH
Oregon State University	YInMn Blue pigment (invented at OSU by Mas Subramanian); advanced ceramics; wave energy	YInMn Blue license agreement (see ROAD-04); ceramic formulation co-development; Charlemagne	LICENSE NEGOTIATION for YInMn Blue

	(marine GIC)	marine GIC research	
Georgia Tech	Power systems; electric grid GIC modeling; materials science (MXene research group)	Substation GIC hardening validation; MXene formulation optimization; Phantom power systems research	INITIAL OUTREACH
Drexel University	MXene foundational research (Gogotsi/Barsoum lab); nanomaterials characterization	MXene IP license; collaborative MXene research; CSM fellowship for MXene PhD students	LICENSE NEGOTIATION + research collaboration
MIT	Materials science; H-FET research; autonomous systems; energy storage	Protonic H-FET research collaboration; Phantom autonomy research; solid-state battery integration	INITIAL OUTREACH
UC San Diego	Structural engineering (large-scale testing); Scripps Institution of Oceanography (marine EM)	Aegis Home structural testing (shake table, fire); Charlemagne hull EM modeling	INITIAL OUTREACH
Caltech	Space weather; JPL solar physics; seismology (Cascadia)	Carrington Event modeling; space weather forecasting integration for CSM Digital Twin; GIC risk map development	INITIAL OUTREACH

7.2 University Partnership Structure

Mechanism	Description	Annual Budget
CSM Research Grants	\$50K-\$150K/year per university for specific research projects aligned with CSM product validation needs	\$500K/year (4-6 active grants)
CSM Graduate Fellowships	Fund 2-3 PhD students per year at partner universities working on CSM-relevant research (MXene, GIC modeling, protonic logic, etc.)	\$180K/year (\$60K per student including tuition + stipend)
CSM Undergraduate Internship Program	10-week summer internships for 5-10 engineering students at CSM El Segundo facility	\$120K/year (\$12K per intern including housing + stipend)
Joint Research Publications	Co-authored papers with university researchers published in peer-reviewed journals — builds CSM's scientific credibility	Included in research grant budgets
CSM Scientific Advisory Board	5-7 faculty members from partner universities providing independent oversight of CSM pilot programs (see honorarium) ROAD-06)	\$105K/year (\$15K/year per member

PARTNERSHIP GOVERNANCE & ENGAGEMENT PIPELINE

Engagement Stages

Stage	Description	Typical Duration	CSM Action
IDENTIFIED	Partner identified as strategic fit; research on partner's needs and decision-makers complete	—	Internal briefing document prepared
INITIAL OUTREACH	First contact made; CSM overview deck shared; introductory meeting scheduled	1-2 months	Steele or Kind makes intro; Zirconia provides technical backup

DEEPENING	Second/third meetings; partner's technical team reviews CSM pilot data, product specs, BOMs (under NDA)	3-6 months	Joint working groups formed; pilot collaboration scoped; term sheet drafted
NEGOTIATION	Legal/commercial terms negotiated; MOU or definitive agreement drafted	2-4 months	Legal counsel engaged; Board approval for Tier 1 partnerships
ACTIVE	Partnership operational; joint projects underway; regular cadence of steering committee meetings	Ongoing	Quarterly business review with partner executive sponsor
SCALING	Partnership expanding to additional products, geographies, or joint ventures	As market allows	Additional agreements; co-investment in manufacturing or distribution

Current Partnership Pipeline Status

Partner	Stage	Next Action	Target Active Date
Swiss Re	INITIAL OUTREACH	Schedule intro meeting; share CSM overview and pilot plan	Q3 2026
D.R. Horton	INITIAL OUTREACH	Present Aegis Home pilot builder partnership opportunity	Q3 2026
Drexel University	NEGOTIATION	MXene IP license terms; research collaboration agreement	Q4 2026
Oregon State University	NEGOTIATION	YInMn Blue license agreement	Q4 2026
Carnival Corporation (Princess)	INITIAL OUTREACH	Charlemagne pilot vessel partnership proposal	Q4 2026
Bonneville Power Administration	INITIAL OUTREACH	GIC monitoring technology partnership	Q4 2026
Northrop Grumman	INITIAL OUTREACH	Phantom military variant / hardened C4I collaboration	Q1 2027
AXA	INITIAL OUTREACH	Joint white paper on GIC risk; European market partnership	Q1 2027
PG&E / SCE	INITIAL OUTREACH	Infrastructure pilot site partnership	Q1 2027
Lloyd’s of London	IDENTIFIED	Approach when first CSM product is insurable (Q3 2027)	Q3 2027

PARTNERSHIP BUDGET — 5-YEAR PROJECTION

Category	2026 (Q3-Q4)	2027	2028	2029	2030	5-Year Total
University Research Grants	\$150K	\$500K	\$500K	\$500K	\$500K	\$2.15M
Graduate Fellowships	\$0	\$180K	\$180K	\$180K	\$180K	\$720K
Undergraduate Internships	\$0	\$120K	\$120K	\$120K	\$120K	\$480K
Scientific Advisory Board	\$0	\$105K	\$105K	\$105K	\$105K	\$420K

Business Development Travel	\$45K	\$120K	\$150K	\$180K	\$200K	\$695K
Conference/Event Sponsorship	\$25K	\$75K	\$100K	\$120K	\$150K	\$470K
Partner Co-Funded Pilot Contributions	(\$250K)*	(\$1.5M)*	(\$3.0M)*	(\$5.0M)*	(\$8.0M)*	(\$17.75M)*
Legal — Partnership Agreements	\$80K	\$200K	\$250K	\$200K	\$150K	\$880K
NET CSM PARTNERSHIP COST	\$50K	(\$200K)*	(\$1.6M)*	(\$3.6M)*	(\$6.6M)*	(\$12.0M)*

*Partner co-funded pilot contributions represent INCOMING funds — CSM's net partnership position is REVENUE-POSITIVE from 2027 onward as partners co-fund pilot programs.

"Partnerships are not handshakes. They are engineered relationships with defined value exchange, measurable outcomes, and mutual accountability. Swiss Re gets first access to the actuarial data that will define a new insurance peril. D.R. Horton gets a differentiated product in a commodity market. Princess Cruises gets insurance premium savings and passenger safety. Drexel gets a royalty stream and a commercialization partner. Every partnership in this document is a bilateral value equation. The art of partnership strategy is finding the intersection where CSM's need for scale meets the partner's need for differentiation." — Director Kairos Steele, CITADEL

Document generated 2026-07-15. All partnership targets are preliminary — formal outreach and NDA execution required before proprietary CSM data is shared. Partner co-funding estimates are $\pm 50\%$ and dependent on successful pilot program design and executive sponsorship. Insurance partnership timeline is contingent on publication of GIC actuarial data (Q2 2027 at earliest). University research grants are budgeted at 100% CSM funding with option for partner cost-sharing.
